Contents

Preface ix

J.O. Dawson, D.G. Kowalski and P.J. Dart, Variation with soil depth, topographic position and host species in the capacity of soils from an Australian locale to nodulate *Casuarina* and *Allocasuarina* seedlings 1

P. Simonet, N.T. Le, A. Moiroud and R. Bardin, Diversity of *Frankia* strains isolated from a single alder stand 13

B. Côté, C.S. Vogel and J.O. Dawson, Autumnal changes in tissue nitrogen of autumn olive, black alder and eastern cottonwood 23

M.W. Paschke, J.O. Dawson and M.B. David, Soil nitrogen mineralization in plantations of *Juglans nigra* interplanted with actinorhizal *Elaeagnus umbellata* or *Alnus glutinosa* 33

L. Chatarpaul and D. Lachance, Is birch a suitable reference in estimating dinitrogen fixation in alders by isotope dilution? 43

A.M. Domenach, F. Kurdali and R. Bardin, Estimation of symbiotic dinitrogen fixation in alder forest by the method based on natural ^{15}N abundance 51

K. Huss-Danell, P.-O. Lundquist and A. Ekblad, Growth and acetylene reduction activity by intact plants of *Alnus incana* under field conditions 61

C.A. Monz and C.R. Schwintzer, The physiology of spore-negative and spore-positive nodules of *Myrica gale* 75

T.C. Hennessey, H.S. Vishniac, E.M. Lorenzi and J.C. Williams, Dinitrogen fixation in a water-stressed Alnus clone is limited by host xerotolerance 89

W.B. Silvester and S.L. Harris, Nodule structure and nitrogenase activity of *Coriaria arborea* in response to varying pO_2 97

J.D. Tjepkema and M.A. Murry, Respiration and nitrogenase activity in nodules of *Casuarina cunninghamiana* and cultures of *Frankia* sp. HFP020203: Effects of temperature and partial pressure of O_2 111

S. Zeng, J.D. Tjepkema and R.H. Berg, Gas diffusion pathway in nodules of *Casuarina cunninghamiana* 119

N. Sanginga, S.K.A. Danso and G.D. Bowen, Nodulation and growth response of *Allocasuarina* and *Casuarina* species to phosphorus fertilization 125

B. Sougoufara, H.G. Diem and Y.R. Dommergues, Response of field-grown *Casuarina equisetifolia* to inoculation with *Frankia* strain ORS 021001 entrapped in alginate beads 133

D. B. Steele, K. Ramirez and M.D. Stowers, Host plant growth response to inoculation with *Frankia* 139

L. Chatarpaul, P. Chakravarty and P. Subramaniam, Studies in tetrapartite symbioses. I. Role of ecto- and endomycorrhizal fungi and *Frankia* on the growth performance of *Alnus incana* 145

R.O. Russo, Evaluating alder-endophyte (*Alnus acuminata-Frankia*-Mycorrhizae) interactions. I. Acetylene reduction in seedlings inoculated with *Frankia* strain ArI3 and *Glomus intra-radices*, under three phosphorus levels 151

J.G. Torrey and S. Racette, Specificity among the Casuarinaceae in root nodulation by *Frankia* 157

S. Racette and J.G. Torrey, The isolation, culture and infectivity of a *Frankia* strain from *Gymnostoma papuanum* (Casuarinaceae) 165

S.J. Kohls and D.D. Baker, Effects of substrate nitrate concentration on symbiotic nodule formation in actinorhizal plants 171

K.A. Thomas and A.M. Berry, Effects of continuous nitrogen application and nitrogen preconditioning on nodulation and growth of *Ceanothus griseus* var *horizontalis* 181

S. Laliberté and M. Lalonde, Co-culture of *Frankia alni* subsp. *pommerii* (strain ACN1^{AG}) with birch *(Betula papyrifera)* protoplasts 189

A. Nittayajarn and D.D. Baker, Methods for the quantification of *Frankia* cell biomass 199

A.M. Berry, R.K.S. Kahn and M.C. Booth, Identification of indole compounds secreted by *Frankia* HFPArI3 in defined culture medium 205

D. Hahn, M. Dorsch, E. Stackebrandt and A.D.L. Akkermans, Synthetic oligonucleotide probes for identification of *Frankia* strains 211

A. Séguin and M. Lalonde, Detection of pectolytic activity and *pel* homologous sequences in *Frankia* 221

J. Bousquet, E. Girouard, C. Strobeck, B.P. Dancik and M. Lalonde, Restriction fragment polymorphisms in the rDNA region among seven species of *Alnus* and *Betula papyrifera* 231

S. Nazaret, P. Simonet, P. Normand and R. Bardin, Genetic diversity among *Frankia* isolated from Casuarina nodules 241
